Hospital functioning is

related both to the provision of medical services to patients but also to appropriate management. The proper combination of these two areas can be a guarantee of success.

Gabos Software has set up a comprehensive and coherent solution and has created a Wide Medical Solution platform based on a single database where information from the white and gray areas is interpenetrating.

Hospital management software

We provide and deliver our solutions to every hospital facility and group of hospitals providing closed medical services as well as open hospital treatment in the clinics.

The Wide Medical Solution software offered by our company is a tool for hospitals offering, among others, the ability to:

- ✓ manage patient records and movements in the hospital,
- ✓ keep electronic medical records,
- ✓ provide patients and medical staff with a range of e-services,
- ✓ keep records of hospital resources,
- ✓ create various types of reports, statistics and forecasts.

We also offer:
training, technical support, service and consultancy that are helpful in the intricate world of computer science in medicine
