

GABOS Software
software provider for your
medical facility

WWW.GABOS.PL

For over 25 years we have been designing and delivering software exclusively for the health sector.

Throughout all these years we have gained the experience of creating new products and we are constantly developing within the medical market. Every day we work on solutions that will make it easier for medical personnel to work, save time and increase patient safety. We have highly qualified staff and continuously work, consult and update our solutions with the medical community.

In response to the needs of the medical market, we are constantly developing our products and creating new ones, including mobile and cloud computing solutions.

- ✓ We are efficient because we focus on solving customer problems,
- ✓ We are honest because we perform our duties conscientiously and **care about building trust to our Clients,**
- ✓ We know what we do because we have a great deal of knowledge of the medical products and related matter

Our solutions

Based on our experience, we have developed a coherent system that allows, for both white and gray areas, to be serviced and managed by every medical facility - Wide Medical Solution.

System for hospitals:

Our solution for hospitals comprehensively combines medical, administrative, management and e-service areas. It was created not only with regard to medicine or administration, but also to the patient.

System for clinics:

Excellent solutions for all clinics: from small to geographically distributed branches. The open medical system encompasses all the functionalities needed to operate the unit and serve the patient.

System for doctors' offices:

A specially prepared service that allows you to support your doctor in an intuitive way. Available as a cloud computing service without the need to invest in hardware.

In addition, we offer our Clients:

Training, technical and service support, and consultations that help in the intricate world of computer science in medicine.

As the WASKO Capital Group

We are able to realize a comprehensive IT infrastructure for every facility; from hardware delivery, construction of infrastructure and maintenance of the system management, to the collocation or acquisition of all maintenance, management and development services..
