WIDE MEDICAL SOLUTION

Based on our 25 years of experience and close collaboration with the medical community, we have developed an integrated system to manage all areas of hospitals and clinics - **Wide Medical Solution.**

The WMS platform supports all medical and administrative processes in a hospital or clinic, streamlines the flow of information between participants in the treatment process, and provides quick access to archival data.

Wide Medical Solution

Based on one and consistent for all modules database, the data once introduced into the system is automatically made available throughout the environment according to the privileges assigned in the system. The medical data collected during the medical process, allows for the settlement of benefits according to the NFZ guidelines or commercial accounting regulations.

THE SOLUTION OFFERS:

- ✓ dedicated functions for hospital staff or clinicsfunkcje
- ✓ dedicated functions for hospitals or clinics
- ✓ responsible and secure data collection and processing
- ✓ e-Services for the patient and unit Staff
- ✓ analytical functions for analyzing data gathered in the system and for making predictions
